MODEL

579

Crafted from a rich history of proven quality and innovation, the Peterbilt Model 579 raises the bar for fuel-efficiency, durability and safety. The distinctive 579 delivers class-leading aerodynamic performance, advanced PACCAR powertrain options and unparalleled driver comfort. The 579 is equipped with numerous driver assistance safety systems including lane departure warning, enhanced collision mitigation and in-lane object detection. The 579 also offers other technology features including standard SmartLINQ® Remote Diagnostics connected truck technology, predictive cruise and Peterbilt's SmartNav infotainment system. Inside, the 579's spacious cab and sleeper interiors surround the driver in comfort while providing amenities that help make life more enjoyable on the road. Available as a day cab or in multiple sleeper configurations, the 579 can be customized inside and out to meet each customer's unique requirements.

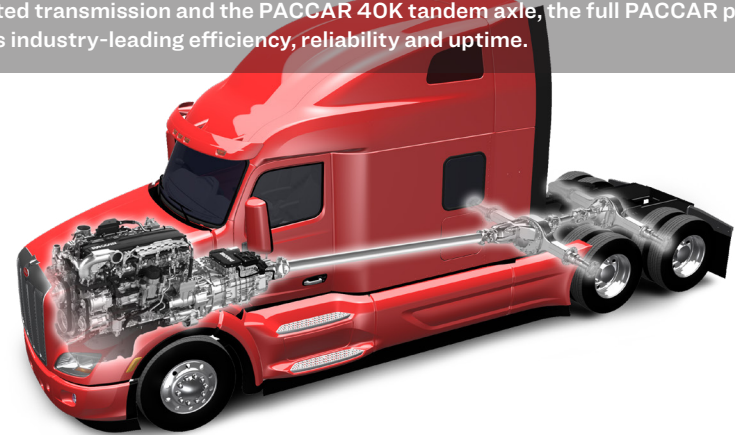

For more information on the Model 579, contact your local Peterbilt dealer or visit peterbilt.com.

PERFORMANCE

With the choice of the PACCAR MX-13 or MX-11 engine, along with the PACCAR 12-Speed automated transmission and the PACCAR 40K tandem axle, the full PACCAR powertrain provides industry-leading efficiency, reliability and uptime.

DRIVER COMFORT

The Model 579 interiors feature premium materials and a superior fit and finish. The Model 579 interior is designed with the driver in mind, with an ergonomic dash and controls to maximize comfort and safety. Multiple interior trim levels and colors are also available for additional customization.

VERSATILITY

The Model 579 is available in a day cab configuration, as well as five sleeper configurations – the UltraLoft, 80", 72", 58" and 44". With additional options like the 579 EPIQ packages, the Model 579 can be spec'd for virtually any application.
